

Passkeys: An Easier, Safer Way to Sign In

What Is a Passkey?

- A passkey lets you sign in using:
 - Your fingerprint
 - Your face
 - Or your device PIN
- No passwords to remember.

Why Passkeys Are Better

- Passkeys are:
 - Simple-no typing
 - Fast-unlock and go
 - Secure-cannot be stolen by scammers

How Passkeys Work

- You unlock your device.
 - Your device logs you in.
 - That's it.

Where You Can Use Passkeys

- Many services now support passkeys:
 - Google
 - Apple
 - Microsoft
 - Banks
 - Shopping sites

What You Need

- To use passkeys, you need:
 - A smartphone, tablet, or computer
 - Fingerprint, face ID, or a PIN

Setting Up a Passkey

- When a website says: “Use a Passkey?”
 - Choose **Continue**.
 - Confirm with fingerprint, face, or PIN

Next Time You Sign In

- Just unlock your device.
- No password needed.

What Is MFA

- Multi-Factor Authentication adds a second step:
 - A text message code
 - A pop-up asking “Is this you?”
- Why MFA Helps
 - Even if someone knows your password, they still cannot get in

Passkeys vs MFA

- Passkeys are: ■
 - As secure as MFA
 - Often **more** secure
 - Easier to use

Staying Safe Online

- Simple safety tips:
 - Never share your PIN
 - Avoid clicking unknown links
 - Keep devices updated
 - Use passkeys when offered
 - If something seems too good to be true, it probably is!!!

You Are the Key

- Your fingerprint, face, or PIN
 - keeps your accounts safe.
